Zhexiang (Bruce) Li

bruceli@ucla.edu | +1 (831) 239-2728 | Los Angeles, CA | Website | GitHub | LinkedIn

Available for internships: Jun 13 - Sep 17, 2027

Education

University of California, Los Angeles Expected Jun 2028
M.S. in Computer Science

University of Southern California May 2026
B.S. in Computer Science; GPA: 3.76/4.00; Viterbi Dean's List

Technical Skills

Languages: Python, C/C++, JavaScript/TypeScript, SQL
AI/ML: PyTorch, Triton; multimodal inference, recommendation, LLM workflows, knowledge retrieval
Applications: FastAPI, Next.js, Supabase, Linux

Engineering & Research Experience

Graduate Researcher | Health Intelligence Lab, UCLA Aug 2026 - Present

- Built patient-disjoint benchmarks and data audits for multimodal glucose forecasting with Prof. Yuzhe Yang, enabling model comparisons at 30-, 60-, and 120-minute horizons.
- Evaluated GluFormer, T1DFormer, and custom predictive-state and Transformer models for research combining CGM with insulin, meals, activity, and patient context.

AI Engineer Intern | PMAOS / Next Big Seek Jul - Aug 2026

- Designed short-video recommendation using bidirectional user-video interest propagation, exposure budgets across multiple timescales, and fatigue controls to manage repeated recommendations.
- Developed audio-visual affect inference supporting **11 languages**, with evidence fusion and a decision layer that can abstain or flag conflicting modalities.

Full-Stack Engineer | Terlingua Threads (Remote) Jan - May 2026

- Built Shopify-integrated pages and Google Maps features, with responsive layouts, accessibility improvements, and maintainable content structures.

AI Engineer Intern | Piezolab Medical, Lake Forest, CA Jun - Aug 2025

- Built an LLM-assisted pipeline to ingest, clean, and cluster **5,000+ medical-malpractice documents** for quality-of-care review.
- Developed agent workflows and acceptance tests for vascular-care research.

Selected AI Projects

AI Doctor WeChat | FastAPI, knowledge retrieval 2026

- Built a clinical teaching and collaboration application connecting WeChat and web workspaces to a FastAPI backend with knowledge retrieval and patient-intake workflows.

AI Business Card Hub | iOS, vision parsing, OCR Jan 2026 - Present

- Built a photo-to-contact workflow combining vision parsing and OCR fallback to create searchable contact and company records; added multi-photo review and bilingual verification. Code

Selected ML Research

Efficient Attention via Pre-Scoring | First author 2025

Under review. Paper

- Implemented informative-key selection in Triton; integrated with HyperAttention, pre-scoring reduced ChatGLM perplexity from **12.0 to 9.5** at 131k-token contexts under a fixed interaction budget.

MedTokenBudget | Sole author 2026

Preprint. Paper

- Built lesion-supervised post-backbone token routing; achieved **80.38%** mean accuracy on ISIC 2019 at a 30% token budget versus 76.93% for ToMe across three seeds.
