Zhexiang (Bruce) Li

bruceli@ucla.edu | +1 (831) 239-2728 | Los Angeles, CA
Website | GitHub | LinkedIn

Internship availability: June 13 - September 17, 2027

Education

University of California, Los Angeles Sep 2026 - Jun 2028 (expected)
M.S. in Computer Science

University of Southern California May 2026
B.S. in Computer Science; GPA: 3.76/4.00; Viterbi Dean's List

Technical Skills

Languages: Python, C/C++, JavaScript/TypeScript, SQL
AI/ML: PyTorch, Triton, LLM workflows, retrieval, multimodal inference, recommendation systems
Development: FastAPI, Next.js, Supabase, Linux; automated testing and static type checking

Experience

AI Engineer Intern | PMAOS / Next Big Seek Jul - Aug 2026

- Designed bidirectional user-video interest propagation with exposure budgets and fatigue controls; validated recommendation logic with 629 tests and strict Mypy across 438 source files.
- Built 11-language audio-visual affect inference with conflict-aware abstention; validated with 139 Python tests and C build gates for Cortex-M3 and ARM926EJ-S.

Graduate Researcher | Health Intelligence Lab, UCLA Aug 2026 - Present

- Built patient-disjoint MetaboNet benchmarking and audit pipelines for multimodal diabetes models; evaluated glucose forecasts at 30/60/120-minute horizons with Prof. Yuzhe Yang.

Full-Stack Engineer | Terlingua Threads (Remote) Jan - May 2026

- Integrated Shopify pages and Google Maps features; improved responsive behavior, accessibility, SEO, and maintainable content structures.

AI Engineer Intern | Piezolab Medical, Lake Forest, CA Jun - Aug 2025

- Built an LLM-assisted pipeline to ingest, clean, and cluster 5,000+ medical-malpractice documents for quality-of-care review; wrote laboratory workflow checklists and acceptance tests.

Selected Projects

AI Doctor WeChat | FastAPI, knowledge retrieval 2026
Connected a WeChat Mini Program and browser workspace to FastAPI services, supporting clinician, assistant, student, and patient-intake workflows.

Fridge Manager | Next.js, Supabase 2026
Built inventory-aware meal and grocery planning from ingredients, leftovers, dietary preferences, and time constraints. howtoeat.food

AI Business Card Hub | iOS, vision parsing, OCR 2026 - Present
Built photo-to-contact extraction with OCR fallback, multi-photo review, bilingual records, and people/company search. Source code

Selected ML Research

Efficient Attention via Pre-Scoring (first author; under review): implemented Triton kernels for informative-key selection and benchmarked against HyperAttention and LevAttention. Paper

MedTokenBudget (preprint): implemented lesion-supervised token routing and evaluated evidence retention under fixed token budgets. Paper
